📍 Sholinganallur, Chennai | ✉ smashwinkarthik@gmail.com | ☎ +91-7418278466 | 🔗 LinkedIn | 🐙 GitHub

👤 Summary

I am a B.Tech student in Artificial Intelligence and Data Science with a decent academic background and practical exposure through internships and projects. I am passionate about exploring data, applying AI/ML techniques, and uncovering insights that support decision-making. I aim to begin my career as a Data Analyst while continuing to build expertise in the broader field of Data Science.

🎓 Education

B.Tech Artificial Intelligence and Data Science St.Joseph's Institute of technology, OMR, Chennai CGPA: 8.21 (up to 6th Sem)	Nov 2022-Present
Higher Secondary Certification SRV Boys Higher Secondary School, Namakkal Percentage: 93	April 2021-May 2022

⚡ Skills

Programming Languages: Python, SQL
Languages Known: Tamil, English
Technical Skills: Artificial Intelligence, Machine Learning, Data Visualization
Soft Skills: Verbal and Written Communication, Teamwork, Problem-Solving
Tools and Frameworks: Power BI, Figma, Canva, Github, VS Code, MySQL, TensorFlow, Pytorch

📁 Experience

Machine Learning Intern Zoom In Data Chennai(Remote) - Completed AI/ML internship on real-world projects. - Built predictive models using ML algorithms and feature engineering. - Gained hands-on experience in data preprocessing, anomaly detection, and ensemble methods.	June - July 2025
Data Science Fellow Dataplay Rajasthan(Remote) - I have learned Basics of Python and Gained hands-on experience solving problems under expert mentorship - Conducted comprehensive Exploratory Data Analysis to identify patterns and correlations in candidate registration data - Created visual reports showcasing insights on demographics, education, internship experience, and placement trends	March - April 2025

🔗 Projects

Facial Recognition System 🔄 - Designed and implemented a facial recognition system using CNNs for identity verification and emotion detection, demonstrating robust performance on preprocessed datasets. - Optimized a TensorFlow-based neural network architecture to achieve real-time face detection and significantly improve inference speed. - Presented the solution at Smart India Hackathon, demonstrating practical AI applications in real-world problem-solving. Tools: Python, TensorFlow, OpenCV, NumPy	Nov-Dec 2024
Automated Vehicle Damage Detection 🔄 - Developed a YOLOv8-based computer vision system to reliably detect and classify various types of vehicle damage, including dents, scratches, and broken glass. - Built an interactive Streamlit web application to automate insurance claim assessments, substantially reducing manual inspection time. - Applied computer vision techniques for precise damage localization, improving overall assessment efficiency. Tools: Python, YOLOv8, Streamlit, OpenCV	Mar-Apr 2025
Voice-Based Insurance Claim Assistant – ClaimMate 🔄 - Built a voice-enabled insurance claim assistant using Python, Streamlit, and Vosk ASR to convert speech into highly accurate structured claim text. - Integrated real-time audio recording and transcription for seamless voice-based data collection. - Streamlined insurance claim workflows, enhancing user experience and significantly reducing manual data entry requirements. Tools: Python, Vosk ASR, Streamlit, Audio Processing	Jun-Jul 2025

🏢 Professional Affiliations

The Institution of Engineers (India) (IEI) - Student Member - Actively engaged with industry trends by attending IEI-hosted webinars on AI and Data Science - Leveraged IEI membership to connect with industry mentors and explore career opportunities in AI and Data Science.

🏆 Certifications

Deloitte-Data Analytics Job Simulation Program – Forage
Essentials of Prompt Engineering – AWS
Python For Data Science – NPTEL
